**11h50 to 12h20:** Presentation of CDCC Compass tool: focus on decision making at reuse and recycling – WeLOOP

**12h20 to 12h30:** Conclusion – Exchanges / Questions & Answers

## **CEDaCI Network group**

This multidisciplinary network gathers actors and experts of all steps and sectors of the life cycle (directly and indirectly) which are associated with the data centre industry. Being on this network will help you to make decisions to develop and to grow up the circularity, thanks to the access of the case studies and economic models. You can also join the partners of the CEDaCI project to identify collaboration opportunities.
